Lake Powell School School Improvement Plan 2026-2027
September 14, 2026

Lake Powell School is working toward reaching common goals with the Kane County School District. Our school is unique in that our secondary students, in grades 8-11, work with their classes and instructors for their IVC classes. They also attend BYU classes and are encouraged to be involved and actively engaged in all their classes. Whole school collaboration between elementary school and secondary students is also planned and provided.

During the 2026-2027 school year, we are investing our Land Trust Funds in early literacy (Kindergarten) and in supporting Tier I and Tier 2 instruction in Grades K-6. Our goal is for at least 80% of our K-6 students reading on grade level. We also focus on student performance and student growth through the Acadience Reading and progress monitoring platform.

Our classroom teacher and our paraprofessional work with small groups of students throughout the day. We are using Wonders by McGraw Hill and the 95% Core Phonics Reading programs. We are also using Into Math by Houghton Mifflin and the Utah SEED standards and materials for science to support our work in teaching the Utah State Core Curriculum Standards.

Another goal is to have frequent communication with parents and staff members. We hold biweekly meetings with school staff. School events are also listed on the school calendar. Weekly communication with parents is done through Binderly and through the Aspire SIS system.

Community involvement is very important here at Lake Powell School. We hold community events at the school. Our Back to School Night event was held on Monday, August 17, 2026. We will hold Red Ribbon/Spirit Week and our school Trunk or Treat at the end of October. Our plans for a holiday event for the community in mid-December is another way to include our community. We will also hold another school Spirit Week in March, along with our one mile school fun run.

Lake Powell School encourages students and staff to read. Students are expected to read at least 20 minutes each day, before or after school. We have also started the school district's monthly Reading Challenge. Students have been reading books from a list of age-appropriate books, which follow the monthly theme. Prizes are awarded to students who reach their monthly reading goals.
